“可持续未来材料”探索与展望
Future Materials: Sustainable Exploration
and Prospect

为推动中国纺织工业未来材料的可持续探索、对话和应用，激发产业未来的可持续领导力，推动产业经济与社会高质量协调发展，中国纺织工业联合会社会责任推广委员会于 2021 年启动首期“可持续未来材料”开源项目，重点开展纺织可持续未来材料的探索性研究。2024 年 3 月，“可持续未来材料”研究成果将正式发布。

In order to promote the sustainable exploration, dialogue and application of future materials in China's textile industry, inspire the future sustainable leadership for the industry, and promote the high-quality coordinated development of the industry's economy and society, the Social Responsibility Construction Association of China National Textile and Apparel Council launched the first phase "Future Sustainable Materials" open-source project in 2021, which focuses on exploratory research into sustainable future materials for textiles. In March 2024, the research findings on "Future Sustainable Materials" will be officially released.
