

2025 Intertextile Spring Edition | Functional / Sportswear Lab (II)

Sunshinetex Group

Booth No: Hall 6.2-C33

Sunshinetex Group was founded in 1999 by Kunshan Huayang New Materials, Nantong Dongyi High-tech, Anhui Huayang Clothing, Suzhou Dongyi Huayang Clothing, and eight other companies. The group boasts advanced weaving, dyeing, printing, coating, composite, PU breathable transfer composite, PU breathable film, and other production and processing equipment and technology. Specializing in the production of various functional fabrics for outdoor sports, safety protection, and fashion leisure, their products lead and exceed the quality standards of similar products. In 2005, they achieved ISO9001:2000 quality management system certification and received Oeko-Tex Standard 100, GRS Global Recycling Standard, and REACH Confidence in Textiles certification. Their products also meet several functional product certifications including EN20471, EN343, EN ISO11612, EN ISO14116, EN1149, EN61482, EN13034, NFPA2112, ANSI/ISEA107, and CAN/CSA-Z96. The company holds over 120 patented technologies and has been a Bluesign partner since 2015.

Main Featured Products in 2025 Intertextile Spring Edition

Sunshinetex Group highlights its key research and development (R&D) trends which include lightweight functional sun protection fabrics, polyester lightweight cotton feather, class 1 and 2 standard hard-shell fabrics, and functional yarn fabrics (with

properties such as heat retention, antibacterial and bacteriostatic, high-quality elasticity, ultra-soft skin feel, moisture-wicking, quick-drying, and permanent antistatic). Additionally, the group will feature high-quality flame-retardant protective workwear, functional knits, knit-like woven fabrics, high-end functional membranes, and more. At the 2025 Intertextile Spring Edition, Sunshinetex Group will mainly showcase four series of products: Extreme Outdoor Series, Lightweight Sun Protection Series, Jungle Military Series, and High-End Elastic Series.

Extreme Outdoor Series

These high-tenacity, wear-resistant, and wrinkle-resistant fabrics are combined with new functional membranes, recycled and biodegradable films, electrospun membranes, PES membranes, and biomass membranes. They boast high water pressure resistance, breathability, and moisture permeability, making them ideal for high-end hard-shell jackets, skiing jackets, and cold-resistant clothing.

Lightweight Sun Protection Series

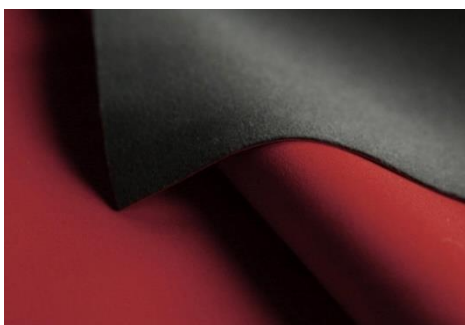

This series includes outdoor windbreaker fabrics made from a lightweight 7D-15D single fabric, processed with post-finishing composite techniques, with the lightest three-layer composite fabric controlled at 45g/m². This offers waterproof and moisture-permeable properties. The sun protection fabrics feature yarn that provides sun protection and a cooling effect, with UPF50+ and UVA < 5%, ensuring long-lasting sun protection and wash durability.

Jungle Military Series

These fabrics feature camouflage tree prints and knitted composite materials that are ultra-soft, skin-friendly, and warm. They offer windproof, waterproof, silent, lightweight, snag-resistant, and wear-resistant properties, making them suitable for hunting gear and other outdoor products.

High-End Elastic Series

This series includes T400/T800 nylon-spandex and polyester-spandex products, suitable for outdoor, sports, and leisure applications. They offer elasticity, skin-friendly comfort, non-restrictive fit, cotton-like comfort, wrinkle resistance, and moisture absorption and wicking properties.

WINSUN TEXTILE
Booth No: Hall 6.2-A52

Winsun Textile has dedicated over 10 years to the development and sales of high-end high-density knitted fabrics, urban lightweight outdoor fabrics, and functional leisure knitted fabrics. With advanced high-gauge high-density circular knitting machines and a complete post-finishing bonding production line, Winsun Textile has achieved OEKO-TEX 100 standard Class 1 certification for green products, GRS certification, and Bluesign® partner certification.

WINSUN TEXTILE WINSUN TEXTILE WINSUN TEXTILE

Main Featured Products in 2025 Intertextile Spring Edition

Winsun Textile will integrate sustainability into its offerings and further launch the “Seasons in Bloom, Running series”, Keeping Cool in the Hot Summer Series”, and “Smart Commuting Edition Series”.

“Seasons in Bloom, Running series”

Experience the freedom of running year-round in breathtaking locations— parks, city streets, beaches, riverside paths, mountain trails, and fairyland valleys. This series features innovative products designed for ultimate comfort and performance. Enjoy a lightweight, seamless feel, enhanced breathability, and protection against adhesion. With moisture absorption and quick drying, you will feel as dry as ever; lightweight nudity makes freedom boundless, enjoy breathability and anti-adhesion with three-dimensional organization; graphene empowers autumn and winter running.

“Keeping Cool in the Hot Summer Series”

No matter you are shuttling between high-rise buildings, slow jogging in urban parks, hiking on trails, or exploring the rugged mountains... Summer life starts with the "fabric", offering exceptional 500+ sun protection, 3A heat shielding, moisture absorption and quick-drying, and continuous cooling effect, helping you combat the scorching heat and enjoy the extraordinary comfort it brings.

“Smart Commuting Autumn Edition Series”

From the high-rise jungle of the city to embrace nature outdoors; from efficient and free-spirited commuting to the leisurely and comfortable nature of sports... “Smart Commuting Autumn Edition Series” features refined designs and high-performance functionality that allow seamless switching between work and leisure. Advantages like moisture absorption and quick drying, UV protection, and easy care ensure all-day comfort and convenience. Additionally, the series is eco-friendly, offering water and windproof capabilities, breathability, cold resistance, warmth retention, and graphene enhancements, ensuring you enjoy every day with ease and comfort.

DOMNEW Textile Technology

Booth No: Hall 6.2-E91

DOMNEW Textile Technology Co Ltd is a leading fabric service provider committed to sustainable comfort technology. With fashion as its core, the company designs and develops diverse product systems tailored to various usage scenarios. Jiashan Dongliang collaborates with renowned domestic brands, including Bosideng Fashion, PEACEBIRD, GXG, ERAL, and Eifini, delivering high-quality fabrics that meet the evolving demands of the market.

Main Featured Products in 2025 Intertextile Spring Edition

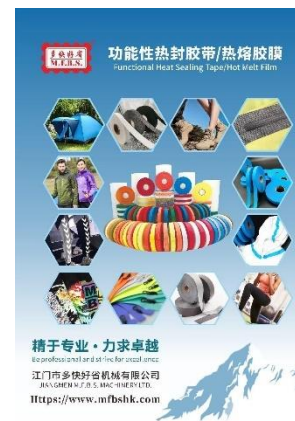

The company is dedicated to developing innovative fabric products that seamlessly integrate sensory technology and fashion. Jiashan Dongliang will showcase fabrics for categories such as down jackets, hard-shell jackets, sun-protective clothing, and more.

Jiangmen M.F.B.S. Machinery Co Ltd Booth No: Hall 6.2-C05

Jiangmen M.F.B.S. Machinery Ltd. was founded in June 2002 (the Flying Dragon Machinery Factory was the former name, established in 1986).

The company has nearly 40 years of industry experience, specializing in the research and development, production and sales of specialized 3L cloth tapes, single-jersey fabric tapes, lycra tapes, plastic-dotted tape, seam reinforcement tape, TPU tapes, composite TPU tapes, printed TPU tapes, protective clothing tapes, hot melt adhesive film (double-side/single-side), overlay tapes/films and water repellent zippers for various industries, such as clothing, footwear, and bags.

Main Featured Products in 2025 Intertextile Spring Edition

Jiangmen M.F.B.S. Machinery will showcase 3L cloth tapes, single-jersey fabric tapes, lycra tapes, plastic-dotted tape, seam reinforcement tape, TPU tapes, composite TPU tapes, printed TPU tapes, protective clothing tapes, hot melt adhesive film (double-side / single-side), overlay tapes/films and water repellent zippers for various industries, such as clothing, footwear, and bags.

Heat sealing tape:

1. 3L cloth tapes
2. seam reinforcement tape
3. single-jersey fabric tapes
4. Printed TPU tape series
5. Composite TPU tape series
6. Protective clothing tapes

Hot melt adhesive film:

1. Hot melt adhesive film (belongs to double-sided adhesive type, special for cloth bonding, trademark, badge fitting, etc.)

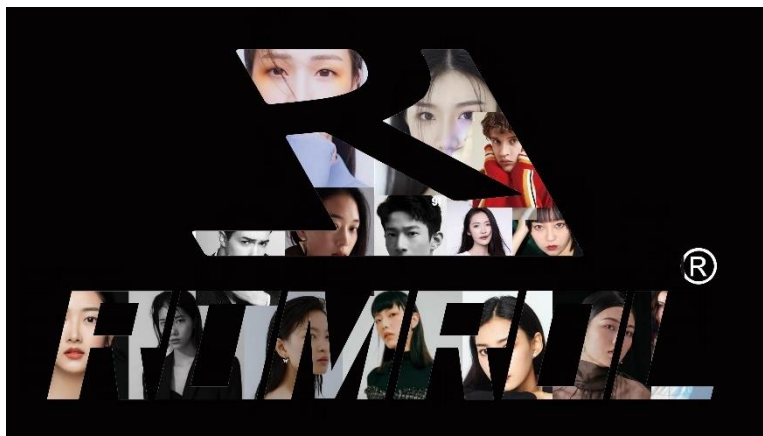

Seamless bonding material:

1. Waterproof zipper tape (special for waterproof zipper)
2. Decorative tape/film (seamless clothing decoration, seamless pockets etc.)
3. Plastic-dotted decorative tape
4. Four-sided elastic tape series

Jiangsu Romrol Group Outdoor Material Co Ltd
Booth No: Hall 6.2-C53

Jiangsu Romrol Group Outdoor Material Co Ltd is a joint venture between Lixin Group and Romrol. Leveraging the comprehensive industrial chain of spinning, weaving, and printing and dyeing owned by Lixin Group, the company has made significant strides in textile technology, fashion, and branding. After years of efforts, Jiangsu Romrol Group has been the strategic partner of lots of world-famous brands, earning a strong reputation in the international market for its high-quality outdoor functional technical fabrics.

Main Featured Products in 2025 Intertextile Spring Edition

Jiangsu Romrol Group specializes in the development, production, and sales of outdoor functional textiles, offering five distinct series: fashion outdoor, sports outdoor, high-function outdoor, down jacket outdoor, and leisure outdoor. With over 1,000 types of textile fabrics, the company provides versatile solutions for diverse applications. Jiangsu Romrol Group will highlight its commitment to environmental sustainability by incorporating bio-based materials into outdoor equipment and introducing innovative plant-based dye materials. This initiative not only reflects their dedication to sustainability but also meets the evolving demands of outdoor enthusiasts and fashion customers seeking eco-friendly and functional solutions.

SUNGOD Technology Co Ltd **Booth No: Hall 6.2-A77**

SUNGOD Technology Co Ltd is dedicated to R&D and manufacturing of nanoporous PTFE membrane (SUNGOD™) and their composites with specialty fabrics. Major business in professional & tender (high-end outdoor apparel, defense force, police, emergency and firefighting workwear, reusable surgical gowns, personal protective equipment (PPE), waterproof footwear materials, and tender projects). SUNGOD Technology leverages technological innovation as its core competitive advantage, explores green trends, and customizes PTFE membrane development to offer all-weather durable protection, multifunctionality, superior comfort, and low-carbon emission solutions.

Main Featured Products in 2025 Intertextile Spring Edition SUNGOD VOLCANO™ Products

By utilizing a specialized flame-retardant process applied to the SUNGOD™ membrane, enabling conventional polyester and polyamide fabrics to achieve advanced flame-retardant properties. In addition to flame resistance, these fabrics offer a range of multifunctional features, including anti-static performance, waterproofing, moisture permeability, fluorescent properties, durable water repellency (DWR), acid and alkali corrosion resistance, and even arc protection.

SUNGOD Membrane™ Three-Layer Composite Products

By integrating ultra-high tear-resistant and abrasion-resistant PA66 fabrics on both the outer and inner layers, combined with advanced nanoporous membrane technology, these lightweight materials deliver exceptional performance, boasting tear resistance, a high waterproof rating of 30,000mm, and breathability exceeding 10,000+ g/m²/24h. Meeting international leading standards, these composites are the perfect high-end materials for hard-shell jackets and ski wear.
