

In this section, we present you Woolen Wool within the Shirting Fabrics Zone located in Hall 6.1!

**Hangzhou Hangmin Dami Textile Trading Co., Ltd.**  
**Booth No: Hall 6.1-E66**

Hangzhou Hangmin Dami Textile Trading Co., Ltd. specializes in the printing and dyeing processing of high-end cotton-linen fabrics, polyester fabrics, and blended textiles for both knitted and woven materials. The company has established long-term collaborations with several well-known domestic and international clothing brands, trading companies, and market clients, forming its own unique product characteristics. Its product quality, level, and added value are leading in the industry.

**Main Featured Products in 2025 Intertextile Spring Edition**  
**Double-sided Satin Dyed Fabric**

It can be dyed in the same color on both sides or in two different colours, offering a rich selection of colours that provides designers with more creative space, showcasing a unique sense of fashion and elegance. The dyed fabric has bright and vibrant colours with good colour fastness, making it resistant to fading and discolouration. It can maintain its aesthetic appeal for a long time, even after multiple wears and washes, preserving a like-new color effect.

**TR Plain Weave Dyed Fabric**

The viscose fiber content in the fabric gives it a soft and smooth touch, making it comfortable against the skin and providing good skin-friendliness.

**Cotton-Spandex Stretch Satin Dyed Fabric**

It features rich and vibrant colours, clear textures, moderate glossiness, and a soft, comfortable feel, with good moisture absorption and breathability.

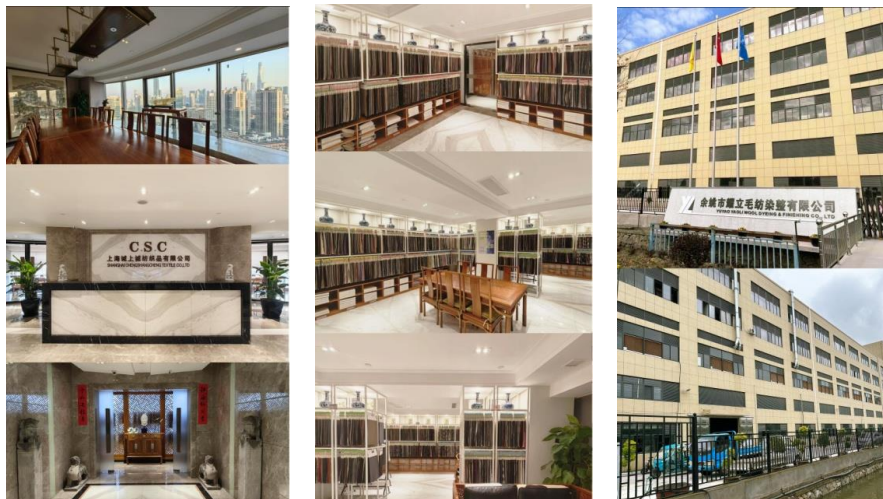

**RN Dyed Fabric**

It has good water-wash colour fastness, moderate friction colour fastness, vibrant colours, a rich palette, and enhanced softness.

**Shanghai Cheng Shang Cheng Textile Co., Ltd  
Booth No: Hall 6.1-E88**

Cheng Shang Cheng is an expert in fabric integration of industry and trade. The company combines research and development, production, and sales, focusing on customer needs while blending fashion and technology to create high-quality fabrics. Based in China, the company serves a global market with clients across Asia, Europe, and America, earning customer trust and widespread acclaim.

### **Main Featured Products in 2025 Intertextile Spring Edition**

Cheng Shang Cheng will focus on coarse woollen fabrics, tweeds, and TR fabrics, while actively expanding into high-quality worsted and synthetic blended products. The company closely follows market trends and integrates the latest show information to develop and launch high-quality fashion fabrics. Noticing that the market is growing weary of single tones, Cheng Shang Cheng is gradually introducing more colours, bringing back plaids and stripes. Considering that the minimalist trend is becoming popularised, multi-layered mixing showcases individuality, which also places higher demands on garment silhouettes. Cheng Shang Cheng enhances its products by diversifying fabric styles and meeting special tactile requirements. As consumer's pursuit of comfort in life continues to grow, fabrics that are soft, comfortable, and have good drape and flow are expected to be very popular both at the exhibition and in future markets.

### **Binzhou Xinhui Woollen Textile Co., Ltd** **Booth No: Hall 6.1-H70**

Binzhou Xinhui Woollen Textile Co., Ltd currently has over 20 sets of supporting equipment introduced from countries such as Italy, Germany, Switzerland, the Netherlands, Belgium, Spain, and Japan. The company has assets of 180 million yuan, employs more than 1,500 people, and produces 3 million meters of coarse woollen fabric, over 1,500 tons of knitted yarn (5S-80S), and more than 1 million woollen sweaters annually.

### **Main Featured Products in 2025 Intertextile Spring Edition**

Xinhui have always adhered to the core philosophy of 'Character in Life, Pursuing Excellence,' reinterpreting cashmere from a unique and innovative perspective. Utilizing the natural characteristics of cashmere and wool, combined with environmentally friendly and healthy plant fibres, they have developed a series of products including printed wool, rabbit cashmere, tweed, navy melton flannel, double-faced fabrics, alpaca series, twill fabrics, fancy yarn series, eco-friendly menswear, jacquard wool, and many more, totalling nearly a thousand products. The product styles feature various textures and patterns such as raised velvet, plain weaves, long and short fibres, double-sided fabrics, checks, prints, tie-dye, distressed fabrics, embossed patterns, flocking, and jacquard, with varying thicknesses to meet the diverse consumer needs of different demographics.

The company targets high-end brands, e-commerce, designer brands, and fast fashion merchants, focusing on showcasing products made primarily from premium natural animal fibres such as cashmere, high-end alpaca, mohair, camel hair, mulberry silk, and high-count wool, as well as innovative products characterized by being high-quality, new, unique, and special. Based on years of sales experience, these products are enthusiastically selected by a wide range of target customers.

### **Hengtong Textile Co., Ltd.** **Booth No: Hall 6.1-H66**

Hengtong Textile Co., Ltd. is one of the earliest specialized manufacturers in Hebei Province engaged in the production of woolen fabrics and dyeing and finishing processes, with over 20 years of history since its establishment. The company integrates an advanced product R&D center, modern spinning and weaving production lines, and a comprehensive marketing service system. It has four production divisions for spinning, weaving, dyeing and finishing, and cashmere dyeing, with marketing branches in Beijing, Shanghai, Guangzhou, and other locations.

The main products include melton, women's wool, plaid fabrics, overcoat fabrics, raised velvet, flannel, smooth wool overcoat fabrics, student fabrics, navy fabrics, uniform fabrics, and billiard cloth. After investing in the construction of two new woolen fabric production lines in 2024, the annual production capacity exceeds 10 million meters, with products exported to Central Asia, Southeast Asia, and countries and regions in Europe and America.

### **Main Featured Products in 2025 Intertextile Spring Edition** **Vintage Textured Woolen Fabric**

The beauty of the original is within reach! This woolen fabric is an ultimate pursuit of the natural authenticity of wool. It employs a unique processing technique that meticulously restores wool to its most primitive state on the sheep. The surface of the fabric showcases a naturally irregular texture with varying thicknesses and lengths, where every undulation and wrinkle seems to tell the story of the wool's growth.

This textured feel not only gives the fabric a unique visual charm but also provides a rich layer in touch. When you gently touch the fabric, your fingertips can clearly perceive its uneven variations, reminiscent of strolling through an ancient wool felt house, embracing nature closely. Compared to traditional smooth woolen fabrics, it lacks a certain deliberate sophistication and gains a touch of simplicity and sincerity.

Whether used to make winter coats, utilizing its primitive texture to fend off the cold, or tailored into elegant suits that highlight the wearer's unique taste, this woolen fabric effortlessly fulfills its role as an excellent medium for merging fashion and nature.

### **Baodingzhongni Textile Co., LTD** **Hall No: 6.1-H69**

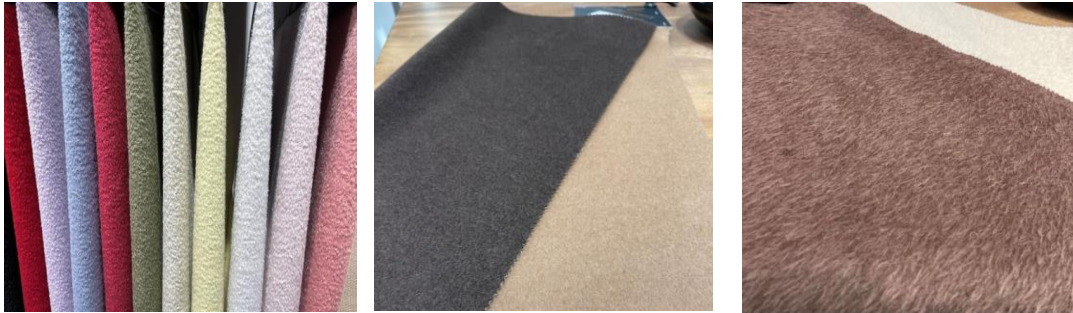

Baodingzhongni Textile Co., LTD is a comprehensive textile enterprise that integrates carding, spinning, weaving, and dyeing and finishing, with an annual production capacity of 4.6 million meters. Over the past decade, the company has been dedicated to providing high-quality woolen products for the domestic and international apparel industry, establishing branches and offices in various locations across the country. They strive to deliver products of excellent quality at competitive prices and provide meticulous services.

In the future, the company will continue to promote a corporate spirit of strong research and development, innovation, continuous learning, and hard work, aiming to deliver high-quality fabrics to a broader world.

### Main Featured Products in 2025 Intertextile Spring Edition

At the 2025 Intertextile Spring Edition, Baodingzhongni Textile Co., LTD Ltd. will mainly showcase a lightweight series of wool fabrics, rare animal fibre fabrics, and a full wool series that offers high cost-performance.

In the future, the company's R&D trends will focus on two directions: first, achieving the utmost cost-performance for conventional products; and second, aligning with the demands of international fashion brands by gradually enriching their high-end product offerings.

### JIANGSU XINFANG SCIENCE&TECHNOLOGY GROUP (ZHANGJIAGANG DAXIN WOOLEN WEAVING&DYEING CO.LTD.) Hall No: 6.1-H81

Jiangsu Xinfang Science&Technology Group (Zhangjiagang Daxin Woolen Weaving&Dyeing Co.Ltd.) is a national development base for coarse wool spinning products, equipped with a highly professional R&D team that invests millions of yuan annually in development. The company mainly focuses on coarse fabrics, semi-fine fabrics, and knitted fabrics, actively practicing the concept of green and sustainable development in terms of raw materials, design, processes, and production.

Their products have successively passed certifications for quality, environmental management, occupational health and safety, and measurement systems, along with various green certifications such as GRS, RWS, RMS, RAS, and BCI. They have also passed factory audits for brands like ZARA and H&M.

Production strictly adheres to a rapid response mechanism suited for 'small batch, diverse varieties, quick delivery, and high quality'. Additionally, they prepare raw materials, yarns, greige fabrics, and finished products based on production plans to ensure prompt order fulfillment.

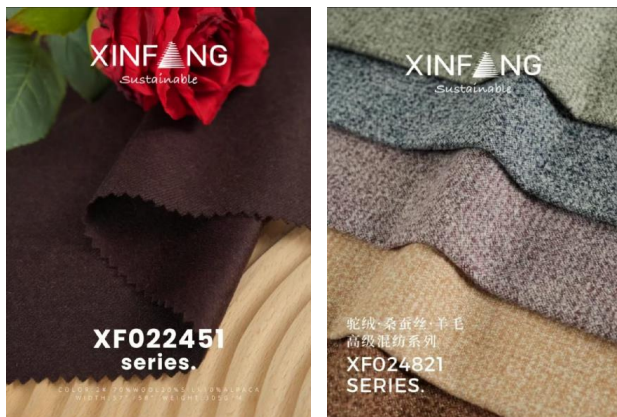

### Main Featured Products in 2025 Intertextile Spring Edition Multipurpose Lightweight Semi-Fine Fabric Series

The 022451 fabric is spun from high-quality raw materials into semi-fine high-count yarns, crafted using special production techniques. The product exudes luxury and is characterized by its lightweight, thin, silky softness, elasticity, breathability, and strong moisture absorption, making it the top choice for fabrics used in women's pants, outerwear shirts, and high-end down jackets.

Classic colors are available in bulk stock, and to meet diverse customer needs, the company offers various grades of wool and eco-friendly fiber blended fabrics, a classic herringbone extension series, and a high-end upgraded lightweight boucle fabric series 024821.

### High-End Alpaca Product Series

This 024738 fabric series features weft yarns made from selected pure fine alpaca fibers, optimized through finishing processes, and available in classic color schemes with timely bulk stock provision. The fabric has a faux fur style, showcasing a naturally fluffy undercoat with strong luster, excellent resilience, warmth, and stability in garment style, resulting in a luxurious and sophisticated appearance.

Additionally, the series includes various styles of high-purity alpaca products such as 024716, 024807, 024423, 021819, 024607, 024795, and 024943, along with the royal-grade baby alpaca series, commonly referred to as cashmere-like.

### Differentiated Double-Sided Lightweight Casual Series

The 024777 fabric is made from imported high-count Australian wool and fine alpaca fibres, utilizing semi-fine spinning and a combination of special production techniques. The product is luxurious and features a lightweight feel, substantial hand, good breathability, and strong resilience, making it the top choice for fashionable casual wear. The company also offers various grades in the 024987 and 024739 fabric series.

**Consinee Group Co.,LTD.**  
**Hall No: 6.1-H21**

Consinee Group Co.,LTD. has been specialising in the production of cashmere yarns and fabrics for over 20 years. It has become a "Leading Enterprise of the Manufacturing Industry " in China's textile manufacturing industry and is the only member from Asia invited to exhibit at the Pitti Filati Luxury Club. The company provides professional yarns and fabrics for numerous international luxury and first-line brands.

As a leader in the "Made in China 2025" 4.0, Consinee Group is also one of the earliest green and environmentally friendly enterprises in the industry, having developed multiple green ecological products. The company produces over 10,000 tons of yarn and 2 million meters of fabric annually, with pure cashmere accounting for more than 20% of its output, making it the largest exporter of cashmere yarns in China.

**Main Featured Products in 2025 Intertextile Spring Edition**

Consinee Group adheres to green environmental protection and sustainable development, focusing on the presentation of low-carbon and eco-friendly products, such as waterproof and breathable fabrics, combining functionality with fashion. The company actively adopts special spinning and weaving techniques, integrating coarse, fine, and semi-fine spinning to alter conventional fabric structures and showcase different textures.

Additionally, Consinee Group is exploring new materials, such as innovatively using fox fur and raccoon fur for fabric development, as well as creating cashmere denim fabrics. They are increasing the R&D ratio of fine-spun coarse products, elevating their fabrics to a new level. At the fair, Consinee Group will present innovative products that align with market trends and changing consumer demands, featuring diverse style positioning and trend directions.

**Natural Animal Fiber Fabrics with Cashmere as the Main Component**

This includes high-end animal fiber fabrics such as cashmere, fine wool, camel hair, and yak down, perfectly combining luxury with comfortable living.

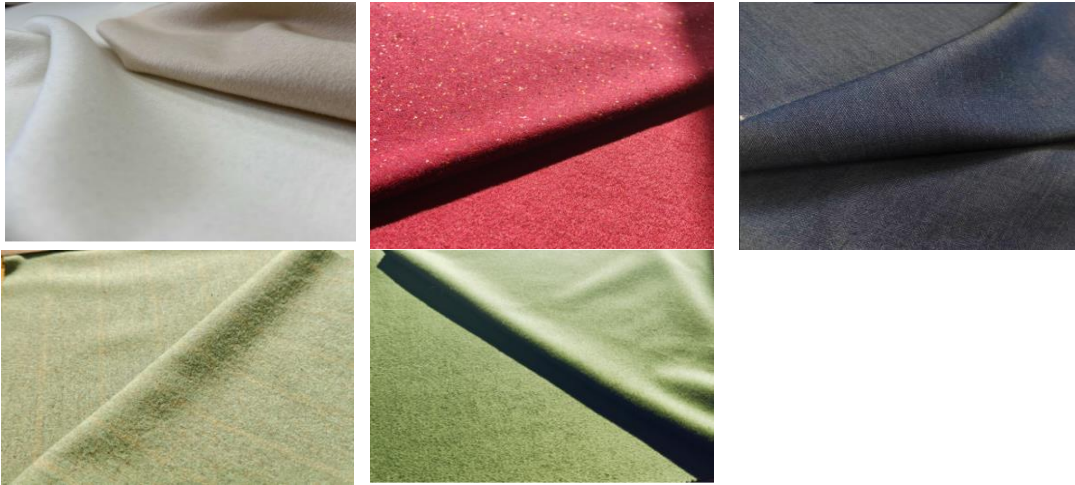

**Technological Innovation in Eco-Friendly Fabrics**

The company is dedicated to the development and innovation of eco-friendly fabrics. This year's latest development, Brewed Protein Fiber yarns and fabrics, has garnered strong attention from luxury brands and the European market. This protein fiber is a technological innovation cultivated in laboratories, friendly to the human body, and can quickly return to nature, making it a highly eco-friendly new textile material.

### Functional and Fashionable Waterproof Fabrics

The membrane windproof storm fabric combines fashion with outdoor sports, enhancing the comfort and safety of outdoor activities while leading the trend in outdoor gear fashion.
